for System Integration in Micro Electronics

Nuremberg, 16 – 18 May 2017

Universal Features Premier Automation Solutions at SMT Hybrid Packaging

Visit Universal Instruments on Hall 4, Booth 101

Uflex.

Ultimate flexibility. Simplified automation.

Uflex™ is an ultra-flexible automation platform, featuring a revolutionary architecture that enables user-level programming and field reconfigurability to speed up time to market and dramatically shorten the payback period.

FUZION

Odd-form assembly made standard.

FuzionOF™ is the fastest high-speed automation platform, delivering unmatched performance for a diverse range of pin-in-paste odd-form, surface mount odd-form and standard surface mount applications.
