

Viscom is presenting its trailblazing inspection solutions for 3D AOI and 3D AXI at this year's world's leading trade fair, productronica, under the slogan "Solutions for me."

You will find a broad range of offerings at Viscom: customized solutions which completely master even highly demanding inspection tasks set by assemblies, components and solder joints. We have an eye on your process efficiency, so you can effectively ensure and optimize your quality management.

5 good reasons to visit Viscom:

1. New: The 3D X-ray inspection system X7056-II combines superb image quality with extremely high throughput – **ideal for high-class electronics in high-volume production**
2. 3D AOI for every task: **Developed for fast product change-overs, miniaturized components** and complex designs of printed circuit boards. You are well equipped with the flexible, future-proof S3088 *ultra gold* – the ultimate premium solution you can variably configure
3. Prevent defects right from the start with **precise 3D solder paste inspection**.
4. Conformal coating problems? Inspect **conformal coatings** with the S3088 CCI, including wet and plasma coating inspection
5. Industry 4.0: As the **only manufacturer we offer an open interface**. Thus the inspection results from the SPI, AOI, AXI and MXI can profitably flow in your entire process chain

Talk to us about your current and future requirements and inspection tasks. To arrange an appointment, just send an e-mail to productronica@viscom.de.
